Study visit report - Rome, Erasmus+

This Padlet showcases our study visit to an Italian school in Rome as part of the course "Environmental Education". We explored innovative practices in eco-friendly education, inclusive teaching methods, and student motivation. Here you'll find reflections, photos, and insights from our inspiring experience in Italy.

School organisation and learning spaces

Liceo Statale G. Caetani is a prestigious high school located in the heart of Rome.

Renowned for its strong focus on foreign language education, the school offers students the opportunity to study multiple modern languages in depth, alongside a solid grounding in classical studies. Latin is taught as a second language after Italian, and students are required to take formal exams in Latin, just as they do for their native language.

With over 900 students and more than 40 well-equipped classrooms, the school provides a dynamic and inclusive learning environment. It is known for its commitment to academic excellence, intercultural awareness, and innovative teaching methods. The students at this school come from diverse backgrounds and bring a wide range of interests and learning styles, enriching the school's atmosphere and contributing to a lively and inclusive community.

The school is well-equipped with a variety of facilities, including specialized laboratories, a gymnasium, a spacious library, and a garden that supports both educational and environmental activities.

Teaching and learning methods

Teachers use a mix of digital tools, educational apps, group work, and individual tasks to create engaging and student-centered lessons. This approach supports different learning styles and encourages both collaboration and independence. In addition to regular classes, the school offers weekly transdisciplinary lessons led by two teachers from different subject areas, such as Italian and Art. These sessions encourage students to make connections between disciplines, deepen their understanding of content, and develop critical and creative thinking.

Inclusion and diversity

The high school is strongly committed to inclusion, ensuring that students with special educational needs (SEN) are fully integrated into the school community. With the support of dedicated teachers in the classroom, these students are able to participate in lessons and complete tasks confidently and successfully. They also take part in a variety of extracurricular activities—such as painting workshops, theatre, and music—together with their peers, fostering a sense of belonging and equal opportunity.

The school also places a strong emphasis on interculturalism, welcoming students from different national backgrounds and promoting a respectful, supportive, and diverse learning environment.

European projects and international cooperation

Liceo Statale G. Caetani is at the beginning of its journey with Erasmus+ projects, yet it is already showing strong commitment to international collaboration and innovation in education. The school is preparing to take part in two exciting courses: one focused on *Digital Skills and Inclusion* in Tenerife, and another exploring the *Differences and Similarities Between the Italian and French Education Systems* in Strasbourg.

In addition to Erasmus+ initiatives, the school also offers a unique *Italy-USA Double Diploma Program*. This allows students to earn an American high school diploma alongside their Italian one, giving them direct access to higher education opportunities in the UK and the USA.

The overall school climate/atmosphere

One key takeaway from the Italian education system is its open and tolerant approach to the realities of young people's lives. The school culture promotes understanding, flexibility, and respect for students' individuality, both in and outside the classroom.

Reflections and ideas to be used in our school

Teachers at this high school not only help students build essential academic skills but also place a strong emphasis on developing artistic abilities and personal expression. They encourage students to share their opinions confidently and think creatively. The staff maintains open, active communication with one another and with the school principal, creating a supportive, collaborative atmosphere that feels like a second family.
